something which our clients will confirm.

SHORT BIO

Labelling System Solutions is proud to offer world class labelling systems which are both imported and locally manufactured, although several basic labelling machines are sold, it prides itself on being able to build equipment to suite each customer's individual needs.

MACHINERY REBUILDS

We can refurbish and upgrade existing Avery and AM Labelling System equipment to improve efficiency of production, however, it does not refurbish or work on any other labelling system. The company does, however, retrofit other labelling systems with its labelling heads and product handling units at customers' request.

TECHNICAL SERVICES

Labelling System Solutions has a technician in Johannesburg. Its technical service time is generally if a client phones in the morning, it will try for that same day. If phoned in the afternoon, it will try for the following morning. We carry a fairly large spares stock at any one time on fast moving lines.
